Outline

Outline

Introduction

Definition

A prime number is a number that has exactly two.

Example

- 2 is prime (two divisors: 1 and 2).
- 3 is prime (two divisors: 1 and 3).
- 4 is not prime (three divisors: 1, 2, and 4).

- **LATEX normally chooses the appropriate font and font size based on the logical structure of the document (e.g. sections). In some cases, you may want to set fonts and sizes by hand!**
- Text visible on slide 1

Second Frame

Proof.

1. Suppose p were the largest prime number.

4. But $q + 1$ is greater than 1, thus divisible by some prime number not in the first p numbers. □

- 2 is prime (two divisors:1 and 2).

Second Frame

Proof.

1. Suppose p were the largest prime number.
2. Let q be the product of the first p numbers.

4. But $q + 1$ is greater than 1, thus divisible by some prime number not in the first p numbers. □

- 2 is prime (two divisors:1 and 2).
- 3 is prime (two divisors:1 and 3).

Second Frame

Proof.

1. Suppose p were the largest prime number.
2. Let q be the product of the first p numbers.
3. Then $q + 1$ is not divisible by any of them.
4. But $q + 1$ is greater than 1, thus divisible by some prime number not in the first p numbers. □

- 2 is prime (two divisors:1 and 2).
- 3 is prime (two divisors:1 and 3).
- 4 is prime (two divisors:1 and 2,4).

Second Frame

Proof.

1. Suppose p were the largest prime number.
2. Let q be the product of the first p numbers.
3. Then $q + 1$ is not divisible by any of them.
4. But $q + 1$ is greater than 1, thus divisible by some prime number not in the first p numbers. □

The proof used *reductio ad absurdum*.

- 2 is prime (two divisors:1 and 2).
- 3 is prime (two divisors:1 and 3).
- 4 is prime (two divisors:1 and 2,4).

Outline

Literature Reviews

Answered Questions

How many primes are there?Deng and Yu (2014)

Open Questions

Is every even number the sum of two primes?(Mackenzie et al., 1992)

Outline

Sample frame title

In this slide, some important text will be highlighted because it's important. Please, don't abuse it.

Remark

Sample text

Important theorem

Sample text in red box

Examples

Sample text in green box. The title of the block is "Examples".

Two-column slide

This is a text in first column.

$$E = mc^2$$

- First item
- Second item

Kamilaris and Prenafeta-Boldú (2018) will be in the second column(Fig. 3(a)) and on a second thoughts(Deng & Yu, 2014), this is a nice looking layout in some cases(Deng & Yu, 2014; Kamilaris & Prenafeta-Boldú, 2018; Mackenzie et al., 1992).
